ABOUT

Designing clear, usable products and the systems that run them.

I'm a UI/UX Designer with a DevOps engineering background, a combination that lets me design interfaces I can also ship, deploy, and keep running reliably. I care about clarity, simplicity, and the small details that make a product feel considered, and I've applied that thinking to platforms used by national institutions and private companies alike.

EXPERIENCE

Where I've Worked

UI / UX Designer · Hexakomb

2023 to 2024

- Designed intuitive, user-centred interfaces for web and digital platforms.
- Shipped the UI/UX for products including Nokanda for Business (biz.nokanda.app).
- Built wireframes, prototypes, and design systems used to guide entire development teams.
- Partnered closely with engineers to take designs from concept to production-ready interfaces.

DevOps Engineer · ScriptyLabs

2021 to 2025

- Designed and maintained CI/CD pipelines to automate build, test, and deployment workflows.
- Containerised applications with Docker and orchestrated deployments using Kubernetes.
- Managed cloud and Linux infrastructure, and applied security best practices across the pipeline.
- Independently run ScriptyLabs' cloud hosting infrastructure end to end, from provisioning and networking to backups and uptime.

- Built DNSSEC support and a self managed DNS system for .rw domains on ScriptyLabs' platform (scriptylabs.rw).

DevOps Engineer (Remote) • Roots Rwanda

2019 to 2022

[rootswanda.rw](#)

- Supporting infrastructure and deployment work remotely for Roots Rwanda.
